PARTH PAWAR

Junior Cloud & DevOps Engineer
Nashik, Maharashtra, India | +91 9579695866 | parthpawar0108pp@gmail.com | github.com/Papaplayer01

SUMMARY

MCA student with a strong foundation in Python and Java and hands-on experience building automated quality gates in CI/CD, including schema validation tests, linting, and secret scanning. Experienced in full-stack web application development and in cloud and web support, with a habit of investigating failures and finding root causes. AWS Certified Cloud Architect, eager to grow in test automation and quality engineering and to use AI tools to speed up testing.

SKILLS

Programming: Java (core Java, DSA, Spring Boot, Spring Cloud), Python, JavaScript, C, C++
Test Automation: Playwright (Java), JUnit 5, Page Object Model, UI and API test automation, schema validation tests, fail-closed CI quality gates, automated linting and secret scanning (Black, Flake8, Gitleaks), Terraform validate
Testing & Quality: Test case design, defect investigation, root-cause troubleshooting, API/schema validation, deployment and web support
API & Backend: Django REST Framework (custom serializers, strict schema validation), REST APIs, microservices, PHP, .NET
CI/CD & DevOps: GitHub Actions, build pipelines, Docker, Git, Linux, Terraform (Infrastructure as Code)
Cloud & Security: AWS (ECS Fargate, ECR, ALB, S3, IAM, OIDC), Google Cloud Platform (Cloud Storage, BigQuery, Cloud KMS, IAM), Azure, least-privilege IAM, RBAC, CMEK encryption, BigQuery row-level security
Frontend & Databases: React.js, HTML, CSS, Bootstrap, MySQL, BigQuery
GenAI & AI Tools: AI Tools Workshop (Parul University, 2024)

PROJECTS

Microservices on AWS - Netflix OSS Pattern | 2026
Java, Spring Boot, Spring Cloud, Docker, AWS ECS Fargate, Terraform, GitHub Actions | *github.com/Papaplayer01/netflix-oss-aws*

- Built four Spring Cloud microservices (Eureka service discovery, Spring Cloud Gateway, product and order services) with a Resilience4j circuit breaker that returns a safe fallback response when a dependent service fails.
- Provisioned AWS infrastructure with Terraform: ECS Fargate services, ECR repositories, Application Load Balancer, Cloud Map private DNS, IAM and CloudWatch logs.
- Automated build and deployment with GitHub Actions using OIDC role assumption (no stored AWS keys) and Terraform remote state in S3.

QA Automation Suite (Java, Playwright, JUnit 5) | 2026
Java, Playwright, JUnit 5, Maven, GitHub Actions | *github.com/Papaplayer01/qa-automation-suite*

- Built a Java test automation framework using the Page Object Model, covering login, cart, sorting, and end-to-end checkout flows, including negative and validation cases.
- Wrote API tests for status codes, response schema, filtering, and error handling using Playwright APIRequestContext.
- Configured GitHub Actions to run the suite on every push and pull request, saving reports and Playwright traces as artifacts for failure investigation.

Employee Security Project | 2026
Google Cloud Platform, Terraform, Django REST Framework, GitHub Actions, Python

- Implemented a fail-closed CI/CD quality gate in GitHub Actions combining linting (Black, Flake8), secret scanning (Gitleaks), schema tests, and Terraform validate, with no manual override path.
- Wrote automated schema tests for a Django REST Framework serializer enforcing exact-match validation, so malformed payloads are rejected before deployment.
- Provisioned GCP infrastructure with Terraform: CMEK-encrypted bucket, BigQuery row-level security, least-privilege IAM.

EXPERIENCE

DSA & Cloud Support Intern, Soliezy Solution | Aug 2023 - Feb 2024

- Diagnosed and resolved deployment and web issues for clients on AWS and Azure to keep applications stable.
- Developed and optimized Java programs to improve algorithmic efficiency; implemented DSA concepts in backend modules for sorting, searching, and data handling.
- Assisted in configuration and monitoring of applications on AWS and Azure.

EDUCATION

Master of Computer Application (MCA), Parul University, Vadodara | 2024 - 2026
CGPA: 7.46

BBA, Computer Applications (BBA-CA), K.K. Wagh Arts, Commerce, Science & Computer Science College, Nashik
2021 - 2024

CERTIFICATIONS

IBM Certified Business Automation | AWS Certified Cloud Architect | Internship Completion, Soliezy Solution (2023) | AI Tools Workshop, Parul University (2024) | Conducted Cloud, DevOps, and AWS classes (Academic Initiative)

RESEARCH WORK

"The Quantum Cloud Computing in Cryptography and Security: Opportunities, Challenges, and Future Directions" (In Progress). Covers post-quantum cryptography, quantum key distribution (QKD), and quantum-era security threats, with case studies from IBM, Azure, Google, and D-Wave.

Languages: English (Fluent), Hindi (Fluent), Marathi (Native)
